

TOE RIVER VALLEY COUNTY NC

Heritage Book Vol 6 2007

No attempt has been made to distinguish persons with identical names when an article herein was indexed. Thus, if John Bailey has a son named John, and he has a son named John, the index to that article will reflect by a single entry, "Bailey, John." However, if they are distinguished in the article as "John (Sr.)," "John (Jr.)," and "John III," then each will get a separate entry in the index, just as it would distinguish "Bailey, John A." from "Bailey, John B."

Females are indexed by their maiden family name. Their married family name, if known, follows in parentheses. For example, the entry "Jones, Mary Jane (Smith)" indicates that Mary Jane Jones married a Mr. Smith. The advantages of doing the index in this fashion is as follows:

1. Suppose that you know that John Jones had a daughter named Mary Jane but you do not know whom she married and would like to know. Lots of luck in finding her if she is listed only as "Smith, Mary Jane."

2. Or, suppose that you are looking for a particular Gutridge Garland (of whom there might be many in the index). If you know that he married Jane Honeycutt, you can find him immediately by looking for "Honeycutt, Jane (Garland)."
